

FEATURED ALUM-A-LIFT
 POWERED ROLL PUSHER WITH INTEGRATED DOCKING TIP

PROJECT
27322

MODEL A3500CSLRPD-72

FEATURING Powered roll pusher, lateral shuttle, overload sensing, and powered drive wheel

HANDLING 1367 lb [620 kg] rolls

DETAILS This lift features a $\phi 6''$ prong, able to pick up rolls of sensitive composite material by the core. An embedded, screw-driven, pusher plate offloads these rolls to a cantilevered rewriter shaft without any manual effort by an operator, eliminating the risk of injury. A docking feature and included adaptors for the destination shafts ensure a safe and repeatable transfer, reducing risk of product or equipment damage.
