

FEATURED ALUM-A-LIFT
TEXTILE AND FABRIC ROLL HANDLING LIFT

PROJECT
27488

MODEL B350CS-84

FEATURING Fixed Lifting Prong and Quick Exchange Battery System

HANDLING 105 lb [48 kg] textile rolls

DETAILS Textile roll handling can be a challenging project. Long, small diameter rolls are typically stored densely in tall shelving or racks. Aisles can be narrow or crowded. This compact lift includes a stainless steel prong that is compatible with fabric roll cores as small as $\varnothing 1.5"$. A set of four swiveling casters maintain a high degree of mobility, making alignment fast and easy. Operators can quickly pick, place and transport rolls around the facility as needed. The lift's quick exchange battery system eliminates downtime for charging affording the lift uninterrupted continuous operation.
