

# FEATURED ALUM-A-LIFT AIRCRAFT EXHAUST NOZZLE MANIPULATOR

## PROJECT 27746

**MODEL** A800CSLR-96

**FEATURING** Redundant Onboard Vacuum Systems, Quick Exchange Battery System, Powered Rotation, Powered Tilting, Quick Exchange Vacuum Head with Adjustable Cup Positions, Safety Straps

**HANDLING** 275 lb [125 kg] Jet Engine Exhaust Nozzle

**DETAILS** After an ergonomic assessment of their engine maintenance procedures, we were contacted by the customer to alleviate an unsafe manual lifting operation of their engine exhaust nozzles. This lift utilizes onboard vacuum with an interchangeable suction head to lift and rotate the different nozzles for inspection and repair.
