

FEATURED ALUM-A-LIFT  
FOLDING OVERHEAD BOOM LIFT

PROJECT  
**29293**

**MODEL** A800CS-72

**FEATURING** Folding overhead boom, Swiveling Hoist Ring, Power supply operation

**HANDLING** 175 lb [80 kg] Components

**DETAILS** Reaching into machines to install and remove components and fixtures can create a unique ergonomic challenge. This lift's slim profile was designed to maneuver in tight spaces and handle components in machines. With a reach of 34 " [864 mm] past the legs, this overhead boom can reach across tables and into machines where leg clearance is unavailable. When the work is done, the boom can also fold down to conserve floor space
