

FEATURED ALUM-A-LIFT
STAINLESS STEEL PHARMACEUTICAL BOTTLE CLAMPING LIFT

PROJECT
29678

MODEL L200SS-84

FEATURING Stainless Steel Construction, 270° Rotating Manual Trunion, Powered Clamp, Low-Profile Clamp Pads

HANDLING 50 lb [23 kg] Bottles and Filter Housings

DETAILS Handling high value equipment in a cleanroom environment can be a tricky process without the proper equipment. That is the exact problem that this lift was designed to solve. With this lift, large heavy equipment is able to be lifted and rotated in a much more ergonomic way. The addition of our clamp force limiter and neoprene clamp pads means that even the more delicate glass instruments can be handled with care.
