

FEATURED ALUM-A-LIFT  
TANDEM LIFT SYSTEM FOR ROTATING ELECTRONICS FRAMES

PROJECT  
**30540**

**MODEL** A1500CS-72

**FEATURING** Mountable Frame Adaptors, Drag-adjustable clamps, Tilt-Up Safety, Tandem Lifting

**HANDLING** 2500 lb. [1134 kg] Frames

**DETAILS** Some electronics frames or racks can weigh upwards of 2000lbs, it is a challenge to manipulate such a frame safely and ergonomically. This featured pair of lifts work together to make lifting and rotating 2500lb frames easy for a single user. When the two lifts are connected, they can both be operated by a single controller to lift and tilt the frame. The speed of rotation can be adjusted by loosening or tightening the frame-adaptor clamps to maintain complete control over the frame.
