

FEATURED ALUM-A-LIFT  
 HEIGHT ADJUSTABLE ASSEMBLY WORK POSITIONER

PROJECT  
**30359**

**MODEL** A800CS-72

**FEATURING** Folding Ramp, Swiveling Platform with Locks, Toolless Retaining Features with Logic Interlocks, Tilt Up/ Deflection Compensation, Floor Mounted Lift System

**HANDLING** 300 lb [136 kg] Medical Device Carts

**DETAILS** Configured for a global medical device company, this lift is designed specifically for the positioning and manufacture of a medical device cart. The rotating platform allows the operator to lift and manipulate the cart into an ergonomic position for value added work, while the toolless retaining features keep the cart secure as components are added to the build. This system allows for height adjustable access as the cart is assembled and for easy transition of a complete cart back to the floor when finished.
