

FEATURED ALUM-A-LIFT
 CLEANROOM LIFT WITH PRECISION SHUTTLING PLATFORM

PROJECT
30396

MODEL A800CRSLR-72

FEATURING Non-marring UHMW lined platform and supports, front to back shuttle with deflection compensation, vertical shuttle, lateral shuttle, spring overload/obstacle encounter, quick exchange batteries

HANDLING 265 lb [120 kg] Components

DETAILS Modern electronics manufacturing equipment often requires servicing sensitive and tough-to-reach components. This Alum-a-Lift features a non-marring platform to gently handle the components while also protecting the tooling it is interfacing with. The highly-adjustable end-effector allows for the fine alignment needed in the tight working area. This ergonomic material handling tool enables a single operator to handle components what would normally require multiple personnel to lift.
