

# FEATURED ALUM-A-LIFT IN-LINE FILTER HOUSING AND CARTRIDGE LIFT

## PROJECT 30598

**MODEL** A800CS-78

**FEATURING** Extended Reach, Low Profile Handles, Manual Gripper, Powered Trunion

**HANDLING** 120 lb [55 kg] Filters

**DETAILS** While this lift could fit a large number of applications for handling cylindrical shaped objects, the specific need for this lift is to grip and rotate heavy duty filters. Filters are removed from racks that require reach more than 2 feet beyond the footprint of the lift. The extended gripper and counterbalance allow the lift to safely accomplish this while maintaining stability, even when fully loaded. At the push of a button, the powered trunion allows the operator to smoothly rotate the filter through 360° of motion for inspection and packaging .
