

FEATURED ALUM-A-LIFT
 TRANSPORTABLE FIELD SERVICE PLATFORM LIFT

PROJECT
31393

MODEL T250-33/34

FEATURING Collapsible, Manually Operated, Height Adjustable ESD Platform

HANDLING 242 lb [110 kg] Components

DETAILS Some field service jobs are too heavy to accomplish without lifting assistance, but large lifts are too cumbersome to move from site to site. When in the stored state, this lift is made to fit into the trunk of a standard sedan. With a setup time of less than 5 minutes, it is quickly ready to aid the operator in equipment maintenance, on-site repairs, replacing UPS batteries, servicing server farms, and more! The belt driven system is operated by a removable hand wheel. The universal input shaft can also be powered by a standard power hand drill for raising and lowering.
